

We are here on behalf of our coworkers, the hardworking members of HPAAE, to deliver a message to Rutgers University President Holloway.

Our union is tired of Rutgers' union busting. We are the workforce you rely on to make this University run. In return, our members stand in lines to make use of the Rutgers food pantry because the pay here is so low. It is a great shame to see our rank and file be disrespected to the point of being driven to hunger.

We compel you to stop delaying and send your team to the table with proposals that will show our membership true value: living wages, real job security, true health and safety agreements and more. The entire state is watching your table. We are united in our support for a strong contract now! You are meeting with the nurses today and the professionals on the 29th.

We demand you send your team to bargaining prepared with proposals ready to meet our needs and settle our contracts.

HPAAE United for a Strong Contract
at Rutgers University
